

NO GRID, NO PROBLEM

The OutBack Maxim Series are ideal for Off-Grid applications where Continuous power is important. Featuring OutBack's FlexPower systems coupled with EnergyCell OPzV batteries, Maxim systems are made to supply clean ongoing reliable power in the harshest of environments.

Maxim systems are capable of delivering enough power to run various loads including refrigerators, ceiling fans, phone chargers, TV's and pumps and provide days of autonomy. *

Inclusions

- **Flexpower System**
<http://www.outbackpower.com/products/integrated-systems/integrated-systems>
 - VFXR Inverter Charger
 - FM80 Mppt
 - Mate3s
 - Hub
 - Flexnet DC
 - Remote Temp Sensor
- **EnergyCell OPzV 2V Gel Batteries**
<http://www.outbackpower.com/products/energy-storage/energycell-opzv>
- **Simpliphi 48V Lithium**
www.Simpliphi.com
- **Optics RE**
<https://opticsre.com/>

What's not included!

- PV array or mounting
- Isolators
- Cabling
- Battery Disconnect (Oh shit switch!)

Optional Extras!

- Battery Stands
- Additional Charge controllers
- Larger systems on request
 - Including 3 phase!
